WORK EXPERIENCE

Software Engineer | Intuit, Mountain View, CA Jan 2026 - Present

- Built a self-serve onboarding portal for financial data and account APIs, enabling TurboTax, Credit Karma, and QuickBooks teams to integrate without manual support reducing onboarding support time by 70%.
- Designed and built RAG-based documentation pipeline ingesting source code across 350+ internal microservices, auto-generating structured API and architecture docs; deployed as live context to LLM-powered developer assistant serving 200+ daily active engineers, reducing API integration time by 40% and LLM costs by 30%.
- Engineered secure, high-throughput data ingestion and processing on Data Exchange (IDX) platform, the financial-data aggregation backbone for QuickBooks, TurboTax, and Credit Karma; handled 50M+ daily transactions processing banking and account data across Intuit ecosystem with 99.95% uptime SLA.
- Architected asynchronous ingestion using Apache Kafka, replacing synchronous bottlenecks and improving throughput 8x while reducing latency from 5s to 200ms for high-volume financial data processing pipelines.
- Built Splunk-based distributed tracing and log analysis tooling to diagnose production data-flow failures; reduced mean time to resolution (MTTR) for Intuit Data Xchange incidents by 60%.
- Owned end-to-end migration of high-volume banking payment flows (10M+ annual transactions) onto consolidated core platform, achieving zero-downtime cutover and full backward compatibility across legacy consumer-facing APIs.

Software Engineer | AT&T, Remote May 2024 - Jan 2026

- Deployed microservices applications built with JavaScript on AWS infrastructure, utilizing dynamic load balancing and autoscaling with AWS services such as EKS, EC2, ASG, ELB, and RDS.
- Implemented Kubernetes for container orchestration, handling tasks like cluster setup, pod deployment, and job management, resulting in a 30% improvement in application performance.
- Automated AWS cloud infrastructure management using CloudFormation and Terraform.
- Built processes with AWS CodeBuild, CodeDeploy, and CodePipeline, reducing deployment time by 40%.

Systems Engineer | Tata Consultancy Services, Hyderabad, India Oct 2021 - Aug 2022

- Contributed to the development of multiple Angular-based web applications, implementing key features using Firebase (Firestore, Authentication, and Cloud Functions) to enable secure, real-time data interactions.
- Built and maintained reusable, responsive UI components by translating Adobe XD designs into production-ready Angular code, ensuring cross-device consistency and design fidelity.

Software Intern | Rover, Hyderabad, India May 2021 - Aug 2021

- Built a farmer chatbot, based on intent classification, using LSTMs and ELMo providing real-time farming insights via third-party APIs like supply prices, and market trends. Backend powered by Flask and Python.
- Integrated chatbot into React Native mobile app, enabling intuitive user interaction by talking to the bot.

SKILLS

- **Languages:** Java, Python, C++, JavaScript, SQL, Bash, C, R
- **AI & Developer Productivity**: Retrieval-Augmented Generation (RAG), LLM Applications, Prompt Engineering, Context Engineering, NLP, AI-Assisted Development
- **Backend & Distributed Systems**: Spring Boot, Node.js, Express.js, REST APIs, gRPC, Kafka, RabbitMQ, Redis, Elasticsearch, Distributed Systems, OAuth, DynamoDB, Cassandra, Redis, MySQL, SQL
- **Cloud & Infrastructure**: Docker, Kubernetes, Terraform, CloudFormation, ArgoCD, Jenkins
- **Logging and Monitoring**: Splunk, Data Quality, AppDynamics, Wavefront, OpenTelemetry, CloudWatch
- **Observability & Reliability**: Splunk, Datadog, Prometheus, Grafana, CloudWatch, ELK Stack, Logging, Troubleshooting, Site Reliability Engineering (SRE)
- **Systems & Networking**: Linux, TCP/IP, DNS, Load Balancing, Networking, Wireshark, Operating Systems
- **Tools**: IntelliJ IDEA, Visual Studio, Cursor, Eclipse, Postman, Jira, Claude CLI

EDUCATION

Master of Science in Software Engineering, San Jose State University Aug 2022 - May 2024

Bachelor of Technology, Computer Science and Engineering, VNR VJIET Jul 2017 - May 2021
